
WEI HANG SEE

Johor, 84900 | 011-58650619 | hangwsee85@gmail.com

Summary

I am mobile computing student which skilled with software development, mobile application design, and database management. Skilled in building user-focused applications using modern programming languages and frameworks, with hands-on experience in both Android and cross-platform development. I took part in Great Malaysia AI Hackathon 2025. where my team created a functioning prototype in 48 hours by utilizing Retrieval-Augmented-Generation(RAG) and AWS services to create an AI-powered solutions that tackles real-world problems.

During my previous internship, I had assigned as Assistant MIS with experience in supporting operational activities and ICT support, skilled in data analysis, Microsoft Excel, system testing, and technical support. Successfully coordinated the implementation and testing of the Zoho system at Vitally SDN BHD, ensuring seamless integration and functionality. At ICT-Zecon Medicare SDN BHD, provided critical support for hospital information systems, enhancing data accuracy and system usability. Career goals include advancing expertise in data management and system optimisation to drive operational efficiency.

Experience

Assistant MIS (Internship) Vitally SDN BHD	01/2026 to 04/2026 Muar
- Assist with the coordination and execution of operational activities to support the smooth running of the operations division - Provide administrative support, including not limited to document management, data analysis, reporting and communication with internal stakeholders. - Assist in the OPS (Order Processing System) and Excel-based data. Input product data, verify measurements, and ensure consistency between the Bill of Materials (BOM) and production statements. - Zoho system implementation and testing: configuring system settings, performing functional testing, troubleshooting issues and documenting the testing procedures. - Work closely with Microsoft Excel to manage and process large datasets: filtering and organizing item data, creating structured spreadsheets, combining multiple datasets, and developing formulas related to product dimensions and pricing logic. Converting price lists into structured formats for system integration, ensure accuracy and clarity for system vendors. - Data organization and reporting: retrieving historical job records, categorizing product types, compiling it into structured Excel files. - Supporting the Customer Service department: Enter customer orders into the systems which including order entry, planning, installation scheduling, and invoice generation. - Consult with the customer service HOD for clarification on the item list that should be updated in the OPS. Compiled the updated item list in the Excel files - Prepared range of written communications, documents and reports.	
ICT Support ICT-Zecon Medicare SDN BHD	06/2023 to 08/2023 Cheras
- To support hospital information system level 1 - To do business requirement analysis - To do documentation - Anticipated future needs of ICT network. supporting forward-planning.	

- Real-time troubleshooting activities: Patient registration, appointment scheduling, prescription flow, and medical reporting
- System testing and validation: Medical dispensing workflow, blood compatibility in the blood bank module. To ensure the system outputs matched expected results. Documenting the issues with detailed explanations and supporting evidence before escalating them to the system vendor.
- Data management tasks using Microsoft Excel: Editing medical reports, verify patient data, and organizing system-related information. Ensure data accuracy and consistency between the system and generated reports.
- System configuration and customization: Creating and modifying various system templates such as consent forms, note templates, referral forms and assessment form based on user requirements. Ensure usability and clarity before deploying them to the production system.
- Technical support and troubleshooting activities: Identified system issues from different departments, analyzed root causes and communicated with the vendors through reports and emails.

Store Worker

03/2021 to 08/2021

Chop B Hong

- Learn the arrangement skill, the skill of stacking the boxes on the pallet.
- To procure, store and issue supplies in a supply operation.
- Organised backroom supplies and managed stock rotation to maximise shelf life of perishable items.
- Participated in stocktaking activities, ensuring inventory accuracy and loss prevention.
- Took stock of products and updated inventory records with new totals.

Skills

- | | |
|--|---|
| <ul style="list-style-type: none"> • Backend Language: PHP, Kotlin, Python, Dart, C++, Java, • Frontend Language: CSS, HTML, and JavaScript • Framework: Flutter, Firebase, Amazon Web Services (AWS) deployment, IBM, Object Oriented Programming • Relational Database Management System(RDBMS): MySQL, Microsoft SQL studio, Microsoft Access | <ul style="list-style-type: none"> • AI integration: Machine learning(recommendation system, predict user behaviour), computer vision(detect objects like YOLO), Natural Language Processing(NLP) (chatbots, voice assistant) • UI & UX design: wireframing (Figma, Miro) • Soft Skills: problem-solving, analytical tinkering, communication skills, team collaboration, time management. |

Education

Bachelor of Science: Bachelor Degree of Computer Science

2026

INTI International University

Nilai

- [Degree] Bachelor of Computer Science major in Mobile Computing
- Specialized in mobile application development, focusing on Android and cross-platform technologies.
- Gained strong foundation in programming languages such as Java, Kotlin, Dart, and JavaScript.
- Experienced in mobile app development using Flutter and Firebase integration.
- Developed applications involving real-time data handling, user authentication, and database management.
- Familiar with UI/UX design principles for mobile interfaces and user-centered design.
- Exposure to software development lifecycle (SDLC), testing, and debugging techniques.

- Coursework in [Campus Navigation Application with GPS and AR Guidance (Final Year Project)]: Developed mobile application app to help students and staffs find the location in university. Technique used: Kotlin, ARcore, google service API]
- Coursework in Mobile Doctor Appointment App: Provide users with a convenient and time-saving way to manage medical appointments Techniques used: Kotlin and Room Database.]
- Coursework in [Agriculture Solution E-commerce Platform: A digital marketplace that connects farmers and vendors with customers, providing a seamless experience for buying and selling agricultural products. The platform includes features for user management, product listings, order processing and analytics. Techniques used: PHP, Features: User authentication & security, Product Management, Order Processing, Vendor management, Admin features]
- Coursework in [Flutter Mobile Application for INTI Enrollment System: User can perform the course enrollment, add/drop course, make payment. Language and Techniques used is Dart, C++, C and HTML using Flutter framework]
- Coursework in [Travel Recommendation System Chatbot: This is empowering applications with intelligent recommendation systems, destination recommendations, itineray planning and accommodation suggestions. Language and techniques used: Python and Jupyter Notebook as IDE, Telegram platform for the chatbot features.]
- [CCNA: Introduction to Networks badge: Ethernet, IP connectivity, IP services, IP subnetting, IPv4 and IPv6 addressing, Network Fundamentals, Switching] Academic Achievement Award
- [AWS Educate Introduction to Cloud 101 badge: AWS cloud, AWS cloud computing] Academic Achievement Award
- [Hall Master in Escape2024: conceive idea and reflection on the props preparation, conduct props preparation for the escape event, setting up event with props and some decorations] Activities and Societies

Diploma of Higher Education: Diploma in Information Technology

2024

INTI International University

Nilai

- Built fundamental knowledge in programming, database systems, and computer networks.
- Learned programming languages such as Java, C++, C#, and web development (HTML, CSS, JavaScript)
- Gained experience in database design and management using SQL.
- Acquired knowledge in networking concepts such as bus topology, hardware & protocols, operating systems (Linux kernel) and computer architecture (CPU, memory, input/output)
- Exposure to software development lifecycle (SDLC) and basic system analysis and design
- [Publicity and Multimedia Coordination in CPC Camp2023: brainstorm idea for the publicity of the camp, design the camping shirt layout, cooperate with other department to prepare the props and decorate for the camp event, take photo and shoot video duiring event day] Activities and Societies
